IMDS REQUEST FORM (International Material Data System)

➤ **Trade name:**
 (For example: *LATAMID 66 H2 G/30 NAT.:0003 X1*)

Reserved to Lati S.p.A.
 Code.....

➤ **Application field** *(please tick as appropriate)*

<input type="checkbox"/> Automotive Please indicate the car manufacturer (For example: <i>LAND ROVER</i>)	<input type="checkbox"/> Electrical	<input type="checkbox"/> Electronic	<input type="checkbox"/> Textile	<input type="checkbox"/> Other Please specify
---	-------------------------------------	-------------------------------------	----------------------------------	---

➤ **Component description:**
 (For example: *climate control switch, glove compartment lock, air filter case*)

➤ **Company / Org.-ID** *(Registration code in the IMDS):*
 (For example: *5022*)

➤ **Quantity purchased in the last year (tons):**
 (tons)

➤ **Latest purchase date:**
 (gg/mm/yyyy)

➤ **Quantity forecasted for the next calendar year (tons):**
 (tons)

➤ **Customer internal material number, if applicable:**
 (For example: *665870018*)

(Please note that the customers specifically asking for their material internal code are invited to notify that in advance, otherwise Lati S.p.A. will put in its own material internal code. We would like to highlight that it will not be possible to modify this code afterwards).

The MDS is provided at the conditions specified in "IMDS Conditions of Data Usage" here attached and available at <http://www.lati.com/pdf/IMDS08.pdf>. **Please send it back duly countersigned as acknowledgement of its receipt** along with this form in order to have your request processed. Thank you very much in advance for your co-operation.

IMDS Conditions of Data Usage

Lati Industria Termoplastici S.p.A. intends to comply with the Directive 2000/53/EC (ELV Directive) by providing the following information above specified threshold values to the Automotive Industry on a harmonized, global basis:

- The percentage by weight of each of the four heavy metals (lead, cadmium, mercury and hexavalent chromium) as required by Article 4 (2) (a) of the ELV Directive (2000/53/EC).
- Any substance listed in the Global Automotive Declarable Substance List GADSL v. 2.0 01/09/2008.

In addition to providing the information necessary to comply with the ELV Directive, Lati Industria Termoplastici S.p.A. supports a process for additional disclosure that protects proprietary information and that provides:

- Polymer type as defined in ISO 11469:2000 to facilitate automotive dismantling and recycling; and
- Principal non-hazardous substances present, identified by generic classification, and their nominal percentage, or range of percentages; and/or
- Proprietary substances present, identified as 'other', and their nominal percentage, or range of percentages with retention of substance identity for fifteen (15) years after their entry into the database.

Any further information will be disclosed only in presence of very founded enquiries based on health and safety issues subject to a prior secrecy agreement.

The composition values are not intended to indicate the actual content in the material, but they are merely meant to represent a typical composition on the purposes of ELV Directive. Thus, the information is given solely to comply with ELV Directive; any other use (for example, but not limited to, quality specifications, health and safety regulations, intellectual properties, etc.) is to be considered improper and invalid.

The data provided are strictly confidential and are not meant to be used outside the system. Any copying, storage, transmission, disclosure, publication and use outside the system is strictly prohibited. The recipient agree to take the strongest measures to safeguard the confidentiality of the information provided, in so limiting the data transmission to the solely subjects that made specific request and having a durable, solid, documented commercial relationship that involves one or more products supplied by Lati Industria Termoplastici S.p.A.

This information is valid only for Lati Industria Termoplastici S.p.A. products as shipped from our facility, and become invalid if the product is mixed with other materials or otherwise altered.

The statement is given in good faith and is based on our current level of knowledge and on the information given by our suppliers. It considers only deliberately introduced substances and known contaminants of the product final composition. It does not consider possible substances formed during subsequent transformation steps of the material. Please note that Lati Industria Termoplastici S.p.A. does not analyse its products for substances not intentionally added.

The data are not intended to substitute for any testing the recipient may need to conduct to determine for itself the suitability of a particular material for a particular purpose. Lati Industria Termoplastici S.p.A. makes no guarantee of results and assumes no obligation or liability whatsoever in connection with this information. In any case, the responsibility is only limited to those commercial subjects and to the period for which is possible to prove a direct continuous commercial relationship with Lati Industria Termoplastici S.p.A., by means of commercial invoices or other written evidences.

Users of products must refer to the Material Safety Data Sheet, for the specific product, for detailed safety information.

For any other issues Lati Industria Termoplastici S.p.A. Conditions of Sales apply. No other term, recommendation, or standard different than the ones mentioned herein was taken into account when entering the data into the system.

If the respective product contains glass fibres, the following applies: the diameter of these glass fibres is $> 8\mu\text{m}$. One of the criteria that defines the carcinogenicity of fibres is a diameter $< 3\mu\text{m}$, according with WHO criteria. As the glass fibres used have larger diameters these fibres are not considered carcinogenic and therefore are not dangerous as per Global Automotive Declarable Substance List GADSL v. 2.0 01/09/2008.

13th October 2008, rev. 2.3
