

LATI, European leader in engineering thermoplastics, achieves IATF 16949:2016 Certification for automotive quality

LATI, among Europe's leading manufacturers of engineering thermoplastic compounds, recently achieved the prestigious IATF 16949:2016 certification, reinforcing its commitment to excellence in quality and opening up new opportunities in the automotive sector.

Vedano Olona - LATI, one of Europe's leading manufacturers of engineering thermoplastics, proudly announced that it has achieved IATF 16949:2016 certification for automotive quality. This milestone, achieved on March 15, 2024, underscores LATI's ongoing commitment to excellence in the industry and confirms its ability to respond to the increasingly stringent requirements of the automotive market.

With a product range that includes more than 2,500 formulations, LATI provides proprietary materials that are exported worldwide through its network of subsidiaries. These materials find use in a wide range of industries, including electrical, electronics, industrial, and transportation.

The IATF 16949:2016 certification represents a significant step for LATI, enabling the company to guarantee high quality standards in its processes and products dedicated to the automotive sector.

The combination of IATF certification and LATI's extensive technical expertise in the electrical and electronics sectors will also open up new business opportunities in the growing and evolving electric vehicle market.

Michela Conterno, CEO of LATI, commented, *"IATF certification is a prestigious and well-deserved achievement for LATI. It reflects our ongoing commitment to improve our processes and provide our customers with high quality solutions. We are confident that this certification will enable us to continue to meet our customers' needs with excellence in the automotive industry."*

Vittorio Gerola, Group General Manager Business at LATI, added, *"The IATF 16949:2016 certification will allow us to more effectively present our solutions in the automotive sector, creating new growth opportunities for the company. It also represents an important recognition of our commitment to quality and professionalism, confirming LATI as a leader in offering valuable solutions."*

IATF 16949:2016 certification further solidifies LATI's position as a leader in offering high-quality solutions in the automotive industry and confirms the company's commitment to operational excellence and customer satisfaction.
